Nikon Corporation Type0016 vendor unique capabilities

Version 1.0.0 Revision 2.1

June 14, 2017

Nikon Corporation

1. Introduction

This document explains the vendor unique capabilities, which are used by Type0016module

(Type0016.md3, Type0016 module.bundle).

These definition values are defined in Maid3d1.h. Refer to the MAID 3.1 Specification for the details of capabilities.

NOTE) These unique capabilities may have different function at another module.

2. Supported camera

Type0016 module can control D5500, D5600 camera.

3. Vendor Unique Capabilities

The vendor unique capabilities that are used by Type0016 module are described as follows.

The under line shows default value.

3.1. ImageSize

This will set the size of image. (Shooting menu)

Capability kNkMAIDCapability_ImageSize

Object types Source

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_PackedString

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetArray,

kNkMAIDCapOperation_Set

Data

L	<u>L(6000*4000)</u>
M	M(4496*3000)
S	S(2992*2000)

The following cases, this Capability cannot be set into.

• When the value of Capability_CompressionLevel is "RAW"

· When the Capability_InfoDisplayErrStatus is True: ON (Error display).

During movie file recording.

3.2. CompressionLevel

This will select the compression level of a picture. (Shooting Menu)

Capability kNkMAIDCapability_CompressionLevel

Object types Source

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_PackedString

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetArray,

kNkMAIDCapOperation_Set

Data JPEG Basic,

JPEG Normal, JPEG Fine,

RAW,

$$\begin{split} & \text{RAW + JPEG Basic,} \\ & \text{RAW + JPEG Normal,} \end{split}$$

RAW + JPEG Fine

The following cases, the module enumerates values which don't include "RAW"

· When the value of Capability_ ExposureMode is EFFECTS ("Miniature Effect",

"Selective Color", "Night Vision", "Toy Camera Effect", "Super Vivid", "Pop" or "Photo Illustration").

• When the value of Capability_HDRMode is except 0 (Off).

The following cases, this Capability is read only.

- When the Capability_InfoDisplayErrStatus is True: ON (Error display).
- During movie file recording.

3.3. WBMode

This will select the white balance mode. (Shooting menu)

Capability kNkMAIDCapability_WBMode

Object types Source

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_PackedString

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetArray,

kNkMAIDCapOperation_Set

Data Auto,

Incandescent, Fluorescent,

Sunny,
Flash,
Shade,
Cloudy,
Measure,
Use Photo

When the Capability_ExposureMode is set to "twilight" or "candle" in Scene modes, "K" is displayed on the camera body. However, the value of this Capability "Auto" returns.

When the Capability_HDRMode is except "0: Off" and the value of this Capability is "Measure", "Measure" is not enumerated.

- When the Capability_ExposureMode is Scene Modes or Special Effects Modes (5: [Scene Modes] Auto, 13: [Scene Modes] Auto (flash off), 14: [Scene Modes] SCENE, 17: [Special Effects] EFFECTS).
- When the Capability_InfoDisplayErrStatus is True: ON (Error display).
- · During movie file recording.

3.4. Sensitivity

This will select the sensitivity of camera (Shooting menu)

Capability kNkMAIDCapability_Sensitivity

Object types Source

ulType kNkMAIDCapType_Enum

 $kNkMAIDArrayType_PackedString$

 ${\bf ulOperations} \qquad {\bf kNkMAIDCapOperation_Get, \, kNkMAIDCapOperation_GetArray,}$

 $kNkMAIDCapOperation_Set$

· · · · · · · · · · · · · · · · · · ·

When Capability_ExposureMode is set to "Program mode" or "Aperture priority" or "Speed priority", and "Manual", "Auto" is not enumerated.

When Capability_ExposureMode is set to "Auto" or "Auto" (flash off)" or "Night vision" of Special Effects Modes, the current value is fixed at "Auto".

By setting Capability_ExposureMode, value range that can be set is limited as follows.

ExposureMode	ISO value range
P,S,A,M	100~25600
Auto, Auto(flash off), Night Vision(EFFECTS)	Auto
Other	Auto, 100~25600

The following cases, this Capability cannot be set into.

- · When Capability_ExposureMode is set to "Auto", "Auto (flash off)" or "Night vision" of Special Effects Modes.
- · When the Capability_InfoDisplayErrStatus is True: ON (Error display).

3.5. ResetMenuBank

This will reset the shooting menu. (Shooting menu)

Capability kNkMAIDCapability_ResetMenuBank

Object types Source

ulTypekNkMAIDCapType_ProcessulOperationskNkMAIDCapOperation_Start

Data None

During movie file recording, this capability cannot be performed.

3.6. WBTuneAuto

This will set the white balance adjustment when the WBMode is "Auto". (Shooting menu)

Capability kNkMAIDCapability_WBTuneAuto

Object types Source

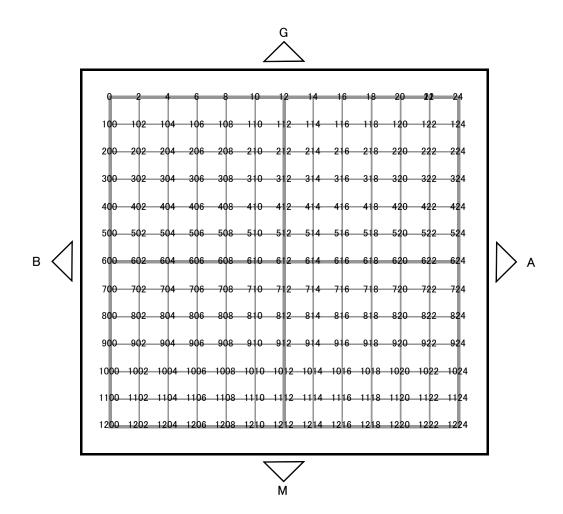

ulType kNkMAIDCapType_Range

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Data 0 to 1224step=1 (Default: 612)

The relationship between white balance adjustment value and the coordinates is shown infollowing figure.

A-B: 0.5step G-M: 0.25step

- When the Capability_ExposureMode is Scene Modes or Special Effects Modes (5: [Scene Modes] Auto, 13: [Scene Modes] Auto(flash off), 14: [Scene Modes] SCENE 17: [Special Effects] EFFECTS).
- · During movie file recording.

3.7. WBTuneIncandescent

This will set the white balance adjustment when the WBMode is "Incandescent". (Shooting menu)

Capability kNkMAIDCapability_WBTuneIncandescent

Object types Source

ulType kNkMAIDCapType_Range

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Data 0 to 1224 step=1 (Default: 612)

The relationship between white balance adjustment value and the coordinates is the same as the figure of Capability WBTuneAuto.

The following cases, this Capability cannot be set into.

When the Capability_ExposureMode is Scene Modes or Special Effects Modes (5:
 [Scene Modes] Auto, 13: [Scene Modes] Auto(flash off), 14: [Scene Modes] SCENE

 17: [Special Effects] EFFECTS).

During movie file recording.

3.8. WBFluorescentType

This will set the fluorescent type when the WBMode is "Fluorescent". (Shooting menu)

Capability kNkMAIDCapability_WBFluorescentType

Object types Source

ulType kNkMAIDCapType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set,

kNkMAIDCapOperation_GetDefault

Data one of eNkWBFluorescentType

0: Sodium-vapor lamps

1: Warm-white fluorescent

2: White fluorescent

3: Cool-white fluorescent

4: Day white fluorescent

5: Daylight fluorescent

6: High temp.mercury-vapor

- · When the Capability_ExposureMode is Scene Modes or Special Effects Modes.
- · During movie file recording.

3.9. WBTuneFluorescent

This will set the white balance adjustment when the WBMode is "Fluorescent".

(Shooting menu)

Capability kNkMAIDCapability_WBTuneFluorescent

Object types Source

ulType kNkMAIDCapType_Range

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Data 0 to 1224step=1 (Default: 612)

The relationship between white balance adjustment value and the coordinates is the same as the figure of Capability_WBTuneAuto.

The following cases, this Capability cannot be set into.

· When the Capability_ExposureMode is Scene Modes or Special Effects Modes.

· During movie file recording

3.10. WBTuneSunny

This will set the white balance adjustment when the WBMode is "Sunny". (Shooting menu)

Capability kNkMAIDCapability_WBTuneSunny

Object types Source

ulType kNkMAIDCapType_Range

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Data 0 to 1224step=1 (Default: 612)

The relationship between white balance adjustment value and the coordinates is the same as the figure of Capability_WBTuneAuto.

- · When the Capability_ExposureMode is Scene Modes or Special Effects Modes.
- · During movie file recording.

3.11. WBTuneFlash

This will set the white balance adjustment when the WBMode is "Flash". (Shooting menu)

Capability kNkMAIDCapability_WBTuneFlash

Object types Source

ulType kNkMAIDCapType_Range

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Data 0 to 1224 step=1 (Default: 612)

The relationship between white balance adjustment value and the coordinates is the same as the figure of Capability_WBTuneAuto.

The following cases, this Capability cannot be set into.

· When the Capability_ExposureMode is Scene Modes or Special Effects Modes.

During movie file recording.

3.12. WBTuneShade

This will set the white balance adjustment when the WBMode is "Shade". (Shooting menu)

Capability kNkMAIDCapability_WBTuneShade

Object types Source

ulType kNkMAIDCapType_Range

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Data 0 to 1224step=1 (Default: 612)

The relationship between white balance adjustment value and the coordinates is the same as the figure of Capability_WBTuneAuto.

- · When the Capability_ExposureMode is Scene Modes or Special Effects Modes.
- · During movie file recording

3.13. WBTuneCloudy

This will set the white balance adjustment when the WBMode is "Cloudy". (Shooting menu)

Capability kNkMAIDCapability_WBTuneCloudy

Object types Source

ulType kNkMAIDCapType_Range

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Data 0 to 1224step=1 (Default: 612)

The relationship between white balance adjustment value and the coordinates is the same as the figure of Capability_WBTuneAuto.

The following cases, this Capability cannot be set into.

· When the Capability_ExposureMode is Scene Modes or Special Effects Modes.

· During movie file recording.

3.14. WBPresetNumber

This will set the preset number referenced by the Capability_WBGainRed,

Capability_WBGainBlue. (Shooting menu)

Capability kNkMAIDCapability_WBPresetNumber

Object types Source

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_PackedString

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetArray,

kNkMAIDCapOperation_Set

Data <u>Measure</u>, Use photo

3.15. WBPresetData

This will set the white balance preset data to the camera. (Shooting menu)

Capability kNkMAIDCapability_WBPresetData

Object types Source

ulTypekNkMAIDCapType_GenericulOperationskNkMAIDCapOperation_Set

Data pointer to NkMAIDWBPresetData structure

 $typedef\ struct\ tagNkMAIDWBPresetData$

{

ULONG ulPresetNumber;----- (This member is not used)

ULONG ulPresetGain;----- gain value

ULONG ulThumbnailSize;---- the thumbnail size set to

"pThumbnailData"

ULONG ulThumbnailRotate;--- (This member is not used)

 $void \verb|^* pThumbnailData|; \verb|------- the pointer to the thumbnail data to$

be set.

} NkMAIDWBPresetData, FAR* LPNkMAIDWBPresetData;

The client must to set all the member of "NkMAIDWBPresetData" structure without "ulThumbnailRotate". The data which is set is saved to "d-1" data area.

The member "ulThumbnailSize" and "pThumbnailData" of "NkMAIDWBPresetData" structure is used only for kNkMAIDCapOperation_Set.

The red gain value is set to the upper 2 bytes, the blue gain value is set to the lower 2 bytes of "ulPresetGain".

The both of red and blue gain value is expressed by the 8.8 format fixed-point number. (e.g. $1.5 \rightarrow \text{gain value}$: 0x0180) The range of gain value is $0 \le \text{gain value} < 8$ (0x0000 -0x07FF).

The thumbnail data set to "pThumbnailData" must be matching the following requirement.

- 1. Theimage data is JPEG.
- 2. The size of image is 160×120 .
- 3. The quality of image is Fine(1/4 compressed).
- 4. The size of image is below 13440 bytes.
- 5. The image cannot include the tag except the following table.

When during movie file recording, this capability cannot be set into.

SOI	Start Of Image	
DQT	Define Quantization Table	
DHT	Define Huffman Table	
SOF	Start of Frame	
SOS	Start of Scan	
	Entropy Coded Data	
	(JPEG data)	
EOI	End Of Image	

3.16. WBGainRed

This will get the gain red of white balance preset data selected by the Capability_WBPresetNumber. (Shooting menu)

Capability kNkMAIDCapability_WBGainRed

Object types Source

 ${\bf ulType} \qquad \qquad {\bf kNkMAIDCapType_Range}$

 ${\bf ulOperations} \qquad {\rm kNkMAIDCapOperation_Get}$

Data Min: 0 Max: 7.9661 (2047/256)

Step: 0.0039 (1/256) (Default: 1)

3.17. WBGainBlue

This will get the gain blue of white balance preset data selected by the Capability_WBPresetNumber. (Shooting menu)

Capability kNkMAIDCapability_WBGainBlue

Object types Source

ulTypekNkMAIDCapType_RangeulOperationskNkMAIDCapOperation_Get

Data Min: 0 Max: 7.9661 (2047/256)

Step: 0.0039 (1/256) (Default: 1)

3.18. ImageColorSpace

This will set color space. (Shooting menu)

Capability kNkMAIDCapability_ImageColorSpace

Object types Source

ulType kNkMAIDCapType_UnsignedulOperations kNkMAIDCapOperation_Get,

kNkMAIDCapOperation_Set,

 $kNkMAIDCapOperation_GetDefault$

Data one of eNkMAIDImageColorSpace

0: sRGB,

1: AdobeRGB

When during movie file recording, this Capability cannot be set into.

3.19. IsoControl

This will set whether auto sensitivity control is used when you take a picture.

(Shooting menu)

Capability kNkMAIDCapability_IsoControl

Object types Source

ulType kNkMAIDCapType_Boolean

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set,

kNkMAIDCapOperation_GetDefault

Data True: used <u>False: not used</u>

When this capability value is set to True, ISO is controlled automatically by the camera in taking picture.

- When the Capability_ExposureMode is Scene Modes or Special Effects Modes.
- · During movie file recording

3.20. NoiseReduction

This will set whether noise reduction is used or not used. (Shooting menu)

Capability kNkMAIDCapability_NoiseReduction

Object types Source

ulType kNkMAIDCapType_Boolean

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set,

 $kNkMAIDCapOperation_GetDefault$

Data True: used <u>False: not used</u>

The following cases, this Capability cannot be set into.

• When the Capability_ExposureMode is Special Effects Modes(Night Vision).

· During movie file recording

3.21. NoiseReductionHighISO

This will set whether noise reduction is used or not used when high ISO. (Shooting menu)

Capability kNkMAIDCapability_NoiseReductionHighISO

Object types Source

ulType kNkMAIDCapType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set,

kNkMAIDCapOperation_GetDefault

Data one of eNkMAIDNoiseReductionHighISO

0: OFF

1: ON (Normal)
2: ON (High)
3: ON (Low)

The following cases, this Capability cannot be set into.

· When the Capability_ExposureMode is Special Effects Modes(Night Vision).

· During movie file recording

$3.22.\ Compress RAWBit Mode$

This will select bit depth for RAW(NEF). (Shooting menu)

Capability kNkMAIDCapability_CompressRAWBitMode

Object types Source

ulType kNkMAIDCapType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetDefault,

kNkMAIDCapOperation_Set

Data one of eNkMAIDCompressRAWBitMode

0: 12-bit1: 14-bit

When during movie file recording, this Capability cannot be set into.

3.23. PictureControl

This will select Picture Control. (Shooting menu)

Capability kNkMAIDCapability_PictureControl

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetArray,

kNkMAIDCapOperation_Set

Data one of eNkMAIDPictureControl

0: Undefined Picture Control

1: Standard 2: Neutral

3: Vivid

4: Monochrome

5: Portrait

6: Landscape

7: Flat

201 - 209: Custom Picture Control 1 - 9

This capability shows the current selected Picture Control.

When the client sends kNkMAIDCapOperation_GetArray, the module returns the all Picture control enumeration value including unused Custom Picture Control.

The client can know whether the Picture Control is used or not by checking

"CustomFlag" in Picture Control Data format.(see Capability_PictureControldata)

When the client sends kNkMAIDCapOperation_Set with unused Picture Control, the module returns kNkMAIDResult_DeviceBusy.

When the Picture Control selected currently is changed,

kNkMAIDEvent_CapChangeValueOnly is issued about this capability. And when the content of Picture Control data is changed, kNkMAIDEvent_CapChange is issued about Capability_ChangedPictureControl.

The following cases, this Capability cannot be set into.

- · When the Capability_ExposureMode is Scene Modes or Special Effects Modes.
- · During movie file recording
- · When the Capability_InfoDisplayErrStatus is True: ON (Error display).

3.24. ChangedPictureControl

This will enumerate the Picture Control item, which is the content, is changed.

Capability kNkMAIDCapability_ChangedPictureControl

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetArray,

Data one of eNkMAIDPictureControl

When the Picture Control is modified by the following factor, this capability reports the list of modified Picture Control to the client by kNkMAIDCapOperation_GetArray.

- · The Picture Control was changed by edit.
- The Custom Picture Control was saved.
- · The Custom Picture Control was deleted.
- · The Custom Picture Control was renamed.

The current value of this capability shows the last modified Picture Control.

After the client gets the list of modified Picture Control by

kNkMAIDCapOperation_GetArray, the module resets the enumeration data and the current value of this capability will be reset to 0, and the list of modified Picture Control will be deleted.

When the Picture Control is reset, kNkMAIDEvent_CapChange is not issued.

3.25. PictureControlData

This will set the assigned Picture Control data of the first generation. And this will get Picture Control data of the second generation. (Shooting menu)

Capability kNkMAIDCapability_PictureControlData

Object types Source

ulType kNkMAIDCapType_Generic

ulOperations kNkMAIDCapOperation_Set, kNkMAIDCapOperation_Get

 $kNkMAIDCapOperation_GetDefault$

Data pointer to NkMAIDPicCtrlData structure

typedef struct tagNkMAIDPicCtrlData

{

ULONG ulPicCtrlItem;----- The target Picture Control

ULONG ulSize;-----The size of Picture Control data (Max: 610 bytes) bool bModifiedFlag; ------Modification flag(false: initial registration,

true: edit)

void* pData;----- The pointer of Picture Control data.

} NkMAIDPicCtrlData, FAR* LPNkMAIDPicCtrlData;

The range of value sets to "ulPicCtrlItem" is enumerated by Capability_PictureControl.

The following cases, this Capability is read only.

During movie file recording.

[In case of Set]

In this Capability, Picture Control data of the first generation will be always set.

When the client sends kNkMAIDCapOperation_Set, the client must set the all the member of NkMAIDPicCtrlData.

If "bModifiedFlag" is false (initial registration), the module updates the current value and default value of Picture Control, by the content of "pData". If "bModifiedFlag" is true (edit), the module updates the current value of Picture Control only, by the content of "pData". The limitations at Set are as follows.

- If "ulPicCtrlItem" is Standard(1), Neutral(2), Vivid(3), Monochrome(4), Portrait(5), Landscape(6), bModifiedFlag must be set to true(edit).
- If "ulPicCtrlItem" is Custom Picture Control(201 209), the "CustomFlag" of Picture Control data must be set to custom (1).
- □ "RegistrationName" will not be used when "ulPicCtrlItem" is Standard(1),

Neutral(2), Vivid(3), Monochrome(4), Portrait(5), Landscape(6).

- If "ulPicCtrlItem" is Neutral(2), Custom Picture Control(201 209), the
- · "QuickAdjustFlag" of Picture Control data must be set to invalid (0).
- □If "ulPicCtrlItem" is Monochrome(4), "MonochromeFlag" of Picture Control data must be set to monochrome (1). If "ulPicCtrlItem" is not Monochrome(4), "MonochromeFlag" of Picture Control data must be set to color(0).
- When "MonochromeFlag" is changed, bModifiedFlag must be set to false(initial registration).
- If the "QuickAdjustFlag" of Picture Control data is valid (1), the camera determines each setting by referring "QuickAdjust" of Picture Control data, and does not refer the other settings. If "QuickAdjustFlag" of Picture Control data is invalid (0), the camera determines each setting by referring the other settings, and does not refer "QuickAdjust" of Picture Control data.
- If "CustomCurveFlag" of picture control data is used (1), the client have to set Custom Picture Control(201 209) to "ulPicCtrlItem".

[In case of Get]

This Capability will get only Picture Control data of the second generation.

When the client sends kNkMAIDCapOperation_Get, the client must set the maximum Picture Control data size, 610, to "ulSize", and set the allocation space for 610 bytes to "pData".

The module sets the size of the picture control data actually set to "pData" to "ulSize" when succeeding in acquisition.

It is possible to get Picture Control data about unused Picture Control data.

The client can know whether the Picture Control data is used or not by referring "CustomFlag". The format of the Picture Control data is shown below.

[Color] First generation

Field	Size (Byte)	Data
		type of Picture Control

[LUT format]

LUT data is composed from LUT and LUT header. LUT is 2048 byte 11 bit * 8 bit, LUT header is 64 byte and is used by host. LUT header format is original specification by host, and the camera is not concerned of the content of LUT header. But, the top 2 byte of LUT header is used for camera to judge LUT header exist or not. So, the client has to set LUT header.

Byte	Contents	
0, 1	Length(2116)	
2, 3	Reserved	
4 ~ 67	Lut Header	
68	Data0	
69	Data1	
• • •		
2115	Data2047	

[LUT header format]

The content of the LUT header set by the application made of Nikon is shown below as the example.

Byte	contents	Range
1	AriaID (Byte1)	0x49
2	AriaID (Byte2)	0x30
3	Input Minimum (Black	0-255
	Point)	
4	Input Maximum	0-255
5	Output Minimum	0-255
6	Output Maximum	0-255
7	Gamma (integer portion)	0-20
8	Gamma (fractional portion)	0-100
9	Number of Spline Points	2-20
10、11	Splime Point1 (x, y)	0-255、0-255
12、13	Splime Point2 (x, y)	0-255、0-255
48、49	Splime Point20 (x、y)	0-255、0-255
$50 \sim 64$	Reserved	0

3.26. PictureControlDataEx

This will get or set the assigned Picture Control data of the second generation.

(Shooting menu)

Capability kNkMAIDCapability_PictureControlDataEx

Object types Source

ulType kNkMAIDCapType_Generic

ulOperations kNkMAIDCapOperation_Set, kNkMAIDCapOperation_Get

kNkMAIDCapOperation_GetDefault

Data pointer to NkMAIDPicCtrlData structure

typedef struct tagNkMAIDPicCtrlData

{

ULONG ulPicCtrlItem;----- The target Picture Control

ULONG ulSize;-----The size of Picture Control data (Max:

610 bytes)

bool bModifiedFlag; ------Modification flag(false: initial

registration, true: edit)

void* pData;----- The pointer of Picture Control data.

} NkMAIDPicCtrlData, FAR* LPNkMAIDPicCtrlData;

The range of value sets to "ulPicCtrlItem" is enumerated by Capability_PictureControl.

The following cases, this Capability is read only.

· During movie file recording.

The following cases, refer to Capability_PictureContorolData.

- · In case of set
- How to use in case of get
- The format of picture control
- The format of LUT

3.27. GetPicCtrlInfo

This will get the Picture Control information. (Shooting menu)

Capability kNkMAIDCapability_GetPicCtrlInfo

Object types Source

ulTypekNkMAIDCapType_GenericulOperationskNkMAIDCapOperation_Get

Data pointer to NkMAIDGetPicCtrlInfo structure

typedef struct tagNkMAIDGetPicCtrlInfo

{

ULONG ulPicCtrlItem;-----The target Picture Control

ULONG ulSize;----The size of Picture Control information (39bytes

fixation)

void* pData;-----The pointer of Picture Control information.

} NkMAIDGetPicCtrlInfo, FAR* LPNkMAIDGetPicCtrlInfo;

The client must set the all the member of NkMAIDGetPicCtrlInfo.

The value range of Picture Control set to "ulPicCtrlItem" is enumerated by Capability_ PictureControl.

The Picture Control information is valid when "ulPicCtrlItem" is color.

If "ulPicCtrlItem" is monochrome or there is no picture control of base, the Picture Control information will be all 0.

The format of the Picture Control information is shown below.

[Picture Control information]

3.51. EnableComment

This will enable to add UserComment to an image file. (SETUP)

Capability kNkMAIDCapability_EnableComment

Object types Source

ulType kNkMAIDCapType_BooleanulOperations kNkMAIDCapOperation_Get,

 $kNkMAIDCapOperation_Set,\,kNkMAIDCapOperation_GetDefault$

Data True: Enable <u>False: Disable</u>

When during movie file recording, this Capability cannot be set into.

3.52. EnableCopyright

This will set whether attach copyright information. (SETUP)

Capability kNkMAIDCapability_EnableCopyright

Object types Source

ulType kNkMAIDCapType_Boolean

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set,

 $kNkMAIDCapOperation_GetDefault$

Data True: attach <u>False: none</u>

The following cases, this Capability cannot be set into.

During movie file recording.

3.53. ArtistName

This will set the artist information. (SETUP)

Capability kNkMAIDCapability_ArtistName

Object types Source

ulType kNkMAIDCapType_String

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Data String shorter than 36 bytes (not including termination '/0')

If the client set string longer than 36 bytes, the module uses 36 bytes from the head, and the space (0x20) before termination '\(\frac{4}{9}\)' of string will be ignored. for example.)

ABCD¤EFG¤¤¤¤¤°¥0°

 \square shows a space (0x20), so 8 space is ignored.

The character, which can be included in the string, is only an ASCII 90 characters. (refer to the table in the ShootingBankName.) When the other character is set, the module returns an error (kNkMAIDResult_ValueOutOfBounds).

The following cases, this Capability cannot be set into.

During movie file recording.

3.54. CopyrightInfo

This will set the copyright information. (SETUP)

Capability kNkMAIDCapability_CopyrightInfo

Object types Source

ulType kNkMAIDCapType_String

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Data String shorter than 54 bytes (not including termination '/0')

If the client set string longer than 54 bytes, the module uses 55 bytes from the head, and the space (0x20) before termination '\$0' of string will be ignored. for example.)

ABCDoEFGooooooo'\(\frac{1}{2}\)O'

 \square shows a space (0x20), so 8 spaces are ignored.

The character, which can be included in the string, is only an ASCII 90 characters. (refer to the table in the ShootingBankName.) When the other character is set, the module returns an error (kNkMAIDResult_ValueOutOfBounds).

The following cases, this Capability cannot be set into.

During movie file recording.

3.55. CameraInclinationMode

This will set whether add or not rotate information to the image file.

(D5500: SETUP, D5600: PLAYBACK)

Capability kNkMAIDCapability_CameraInclinationMode

Object types Source

ulType kNkMAIDCapType_Boolean

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set,

kNkMAIDCapOperation_GetDefault

Data <u>True: Add</u> False: not Add

When the value of this capability is set to False, the Capability_CameraInclination is always zero (Level).

When during movie file recording, this Capability cannot be set into.

3.56. ClockDateTime

This will set the built-in clock of camera. (SETUP)

Capability kNkMAIDCapability_ClockDateTime

Object types Source

ulType kNkMAIDCapType_DateTime

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Data kNkMAIDDataType_DateTimePtr

[D5500]<u>20150101T000000</u>: <u>2015/01/01 00:00:00</u> [D5600]<u>20160101T000000</u>: <u>2016/01/01 00:00:00</u>

When during movie file recording, this Capability cannot be set into.

3.57. ShutterSpeed

This will set the shutter speed.

Capability kNkMAIDCapability_ShutterSpeed

Object types Source

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_PackedString

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetArray,

kNkMAIDCapOperation_Set

Data Strings of shutter time in second. (e.g.) "1", "1/1.3", "1/1.6",

"x 1/250", "x 1/200",

The information whether the exposure is over or under can not be acquired by getting only the value of this capability. In the condition that the information of the shutter speed being blinking is acquired form the value of Capability_BlinkingStatus, the exposure is over if the Capability_ShutterSpeed is maximum value. The exposure is under in the same condition if the Capability_ShutterSpeed is minimum value instead.

When the Capability_MovieManualSetting is "1 ON", the value of ExposureMode is "Manual" and running LiveView, the range of values should be changed as follows.

Framerate	Shutter speed
24p、25p、30p	1/4000~1/30
50p、50i	1/4000~1/50
60p、60i	1/4000~1/60

In any of the following, the "Bulb, Time" cannot be set into.

- When the Capability_ExposureMode is not "Manual".
- When the Capability_HDRMode is not 0 (Off)

The following cases, this Capability cannot be set into.

- When the Capability_ExposureMode is "Program", "Aperture Priority", "Scene Mode" or "EFFECTS".
- When sequence error has occurred.
- When the Capability_RetractableLensWarningStatus is "True: Warning about retraction".

3.58. FlexibleProgram

This will set the Flexible program value.

Capability kNkMAIDCapability_FlexibleProgram

Object types Source

ulType kNkMAIDCapType_Range

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Data -5∼+5EV (Default value: 0)

The module set the step values same as Capability_EVInterval. When the Capability_EVInterval, Capability_ExposureMode is changed, the capability is set to default(0), and the module sends to the client kMAIDEvent_CapChange or kMAIDEvent_CapChangeValueOnly.

The following cases, ulVisibility of this capability is invalid and this capability is set to read-only.

- When the Capability_ExposureMode is not "Program".
- · When sequence error has occurred.
- · When the Capability_RetractableLensWarningStatus is true.

3.59. FocusPreferredArea

This will select the preferred focus area.

 $\begin{tabular}{ll} \textbf{Capability} & kNkMAIDCapability_FocusPreferredArea \\ \end{tabular}$

Object types Source

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_Unsigned

ulOperations kNkMAIDCapOperation_Get,

kNkMAIDCapOperation_GetArray, kNkMAIDCapOperation_Set

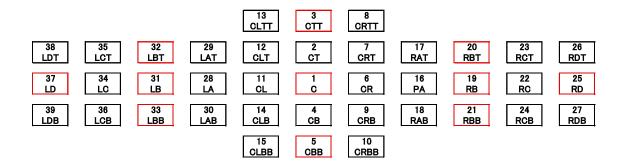

Data one of eNkMAIDFocusPreferred4

0-39 (default 1)

When the value of this capability is 0, it is shown that the focus point is not decided.

The relationship between focus point and the value of this capability is shown in following figure.

When the Capability_AFAreaPoint is 11 points, the range is 0-11 can be selected by this Capability.

The following cases, this Capability cannot be set into.

- · When the Capability_FocusAreaMode is "Auto-area AF".
- When the value of Capability_LiveViewStatus is 1(ON).

3.60. Aperture

This will set the aperture.

Capability kNkMAIDCapability_Aperture

Object types Source

ulType kNkMAIDCapType_EnumkNkMAIDArrayType_PackedString

ulOperations kNkMAIDCapOperation_Get,

kNkMAIDCapOperation_GetArray, kNkMAIDCapOperation_Set

Data String of F value (e.g.) "1.4", "1.6", "1.8"...

When aperture is not set to minimum(FEE), this capability is read-only and the string of "FEE" is set. When this capability is "FEE", the module can't execute capture-command.

When sequence error has occurred, the ulVisibility of this capability is set to invalid and ulOperations of this capability is set to read-only and the current value is invalid. If the ulOperations is changed, the module sends to the client kMAIDEvent_CapChange.

The information whether the exposure may be over or under can not be acquired by getting only the value of this capability. In the condition that the information of the aperture being blinking is acquired form the value of Capability_BlinkingStatus, the exposure is over if the Capability_Aperture is minimum value. The exposure is under in the same condition if the Capability_ShutterSpeed is maximum value instead.

In one case of following, this capability cannot be set into.

- In Program, Speed Priority, Scene Mode, or Special Effects Modes, the Capability_ExposureMode is.
- When the lens is not set as the minimum iris diaphragm. (The state of the lens is "FEE".)
- · When a sequence error has occurred
- In the lens case of not equipping.
- When Capability_RetractableLensWarningStatus is "True: Warning about retraction".

3.61. MeteringMode

This will get the metering mode.

Capability kNkMAIDCapability_MeteringMode

Object types Source

ulType kNkMAIDCapType_UnsignedulOperations kNkMAIDCapOperation_Get,

kNkMAIDCapOperation_Set, kNkMAIDCapOperation_GetDefault

Data one of eNkMAIDMeteringMode

0: Matrix

1: Center weighted

2: Spot

When the CPU lens is not attached, 1(Center weighted) will be applied for metering mode.

The following cases, this Capability is set to read-only.

- · When the Capability_ExposureMode is Scene Modes or Special Effects Modes.
- When AE locked.
- During movie file recording.
- When the value of Capability_LiveViewImageZoomRate is not "0: Whole display".

3.62. ExposureMode

This will select the exposure mode.

Capability kNkMAIDCapability_ExposureMode

Object types Source

ulType kNkMAIDCapType_EnumkNkMAIDArrayType_Unsigned

ulOperations kNkMAIDCapOperation_Get,

kNkMAIDCapOperation_GetArray, kNkMAIDCapOperation_Set

Data one of eNkMAIDExposureMode

0: Program mode

1: Aperture priority

2: Speed priority

3: Manual

5: [Scene Modes]Auto

13: [Scene Modes] Auto(flash off)

14: [Scene Modes] SCENE Other scenes

17: [Special Effects] EFFECTS

The value of 5, 13 and 14 is called Scene Modes. If [14: SCENE Other scenes] is set, the Scene Modes—set by Capability_SceneMode will be used.

If [17: Special Effects] is set, the Special Effects Mode set by Capability_EffectMode will be used.

Shooting mode listed during Live View is composed of "Program mode", "Aperture priority", "Speed priority", and "Manual".

The following cases, this Capability cannot be set into

- · When the Capability_LockCamera is false.
- · During movie recording.

3.63. ExposureComp

This will set the exposure compensation value.

Capability kNkMAIDCapability_ExposureComp

Object types Source

ulType kNkMAIDCapType_Range

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Data -5∼+5EV (Default value: 0)

The module sets the step value same as Capability_EVInterval. When the Capability_EVInterval is changed, the module sends to the client kMAIDEvent CapChange.

If any of the following, this Capability cannot be set into.

- When the Capability_ExposureMode is Scene Modes or the value other than "Night Vision" of Special Effects Modes.
- · When the Capability_InfoDisplayErrStatus is True (ON).

3.64. ShootingMode

This will set the shooting mode.

Capability kNkMAIDCapability_ShootingMode

Object types Source

ulType kNkMAIDCapType_EnumkNkMAIDArrayType_Unsigned

ulOperations kNkMAIDCapOperation_Get,

kNkMAIDCapOperation_GetArray, kNkMAIDCapOperation_Set

Data one of eNkMAIDShootingMode

0: SingleFrame
1; Continuous L
2: Continuous H
3: Self-timer
5: Quick-response remote (Only D5500 is supported)
6: Delayed remote (Only D5500 is supported)
8: Quiet

If any of the following, the ulOperations cannot be set into.

- · When the Capability_InfoDisplayErrStatus is True: ON (Error display).
- During movie file recording.

3.65. ContinuousShootingNum

This will set the number of shots in continuous shooting by host.

Capability kNkMAIDCapability_ContinuousShootingNum

Object types Source

ulType kNkMAIDCapType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

 $kNkMAIDCapOperation_GetDefault$

Data 1

(same as the default value of Capability_RemainContinuousShooting)

The maximum value of this capability is the same as the default value of Capability_RemainContinuousShooting.

When the value of Capability_EnableBracketing is ON and execute bracketing on continuous mode, the client must set the value more than the bracketing number of shot to this capability. But if the client sets the value more than the bracketing number of shot, bracketing will be stop at the setting the bracketing number of shot on continuous mode.

When during movie file recording, this Capability cannot be set into.

3.66. FocusAreaMode

This will select the AF area mode for phase detection on still image shooting.

Capability kNkMAIDCapability_FocusAreaMode

Object types Source

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_PackedString

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetArray,

 $kNkMAIDCapOperation_Set$

Data

9-points dynami-area AF	"Dynamic(9 points)"	
Single-point AF	"Single"	
Auto-areaAF	"Auto"	
3D – tracking	"3D-tracking"	
21-points dynami-area AF	"Dynamic(21 points)"	
39-points dynami-area AF	"Dynamic(39 points)"	

In the following table, the default value is changed by Scene modes or Special Effects Modes.

When the setting of Capability_ExposureMode is changed to Scene Modes or Special Effects Modes, the value of this capability will be changed to each default value.

Capability_ExposureMode Capability_SceneMode Capability_EffectMode	Default
Auto(Scene Modes) Auto(flash off) (Scene Modes) Portrait(Scene Modes) Landscape(Scene Modes) Child(Scene Modes) Night Landscape(SCENE) Party/Indoor(SCENE) Beach/Snow(SCENE) Sunset(SCENE) Dusk/Dawn(SCENE) Blossom(SCENE) Autumn Colors(SCENE) Night Portrait(SCENE) Color Sketch(EFFECTS) Selective Color(EFFECTS) Toy Camera (EFFECTS) Pop(EFFECTS) Photo Illustration(EFFECTS)	Auto
Night Vision(EFFECTS)	Single

Miniature Effect(EFFECTS)	(unchangeable)
Close up(Scene Modes) Candlelight(SCENE) Food(SCENE) Silhouette(EFFECTS) High Key(EFFECTS) Low Key(EFFECTS)	Single
Sports(Scene Modes) Pet Portrait(SCENE)	Dynamic(39 points)

When Capability_AFMode is AF-S(0), "3D-tracking" and "Dynamic(9/21/39points)" cannot be set into.

When the value of this capability is "3D-tracking" or "Dynamic(9/21/39points)" and sets the value of Capability_AFMode to AF-S(0), The value of this capability is changed to "Single".

The following cases, this capability cannot be set into.

- · When the value of Capability_AFMode is MF (0).
- · The CPU lens is not attached.
- When the Capability_ExposureMode is set to Special Effects Modes and the Capability_EffectMode is set to Night Vision or Miniature Effect.
- · When the value of Capability_LiveViewStatus is 1(ON).

3.67. EnableBracketing

This will set whether bracketing is active or not.

Capability kNkMAIDCapability_EnableBracketing

Object types Source

ulType kNkMAIDCapType_Boolean

ulOperations kNkMAIDCapOperation_Get,

kNkMAIDCapOperation_Set, kNkMAIDCapOperation_GetDefault

Data True: ON False: OFF

When Capability_BracketingVary does not set into WB bracketing or ADL bracketing, and the value of Capability_EVInterval is changed, the value of this capability is changed to False(OFF).

If any of the following, this Capability cannot be set into.

- · When the Capability_ExposureMode is Scene Modes or Special Effects Modes.
- When the value of Capability_BracketingVary is "WB bracketing", and if Capability_CompressionLevel is either "RAW", "RAW+JPEG(Basic)", "RAW+JPEG(Normal)" or "RAW+JPEG(Fine). (The ulVisibility of this capability is set to invalid.)
- · When the value of Capability_HDRMode is except 0 (Off).
- During movie file recording.

3.68. AEBracketingStep

This will set the exposure increment for AE, SB, AE/SB bracketing.

Capability kNkMAIDCapability_AEBracketingStep

Object types Source

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_Unsigned

ulOperations kNkMAIDCapOperation_Get,

kNkMAIDCapOperation_GetArray, kNkMAIDCapOperation_Set

Data one of eNkMAIDAEBracketingStep

0: 1/3EV 1: 1/2EV 2: 2/3EV 3: 1EV

3.72. LiveViewStatus

This will start or stop Live view and show status of Live view.

Capability kNkMAIDCapability_LiveViewStatus

Object types Source

ulType kNkMAIDCapType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set,

kNkMAIDCapOperation_GetDefault

Data one of eNkMAIDLiveViewStatus

0: OFF 1: ON

When the client start Live view, the client must set the value of this capability to ON(1). And when the client stop Live view, the client must set the value of this capability to OFF(0).

In case of kNkMAIDCapOperation_Get, the value of this capability will show the current status of Live view.

If the client want to get Live view image by Capability_GetLiveViewImage, the client have to set the value of this capability to ON(1) beforehand.

The client have to check this value before closing Source object, and if the value of this capability is ON(1), have to set to OFF(0).

When the Live view is started, the status of camera will be changed to Lock camera internally, but the value of Capability_LockCamera kept the current value.

The client has to check the value of Capability_LiveViewProhibit, and when the value of Capability_LiveViewProhibit is not 0, Live view will not be started.

When the Capability_ExposureMode is Scene Modes or Special Effects Modes, the ulOperations of this capability cannot be set into.

3.73. LiveViewProhibit

This will show the status of Live view prohibition.

 $\textbf{Capability} \hspace{1cm} kNkMAIDCapability_LiveViewProhibit$

Object types Source

ulTypekNkMAIDCapType_UnsignedulOperationskNkMAIDCapOperation_Get

Data one of eNkMAIDLiveViewProhibit

The live view prohibition is shown by the OR value of the following definition value.

If non-0, the value of this Capability is prohibited Live view.

value	Conditions prohibited
0x80000000	Exposure Mode is non-P,S,A,M.
0x01000000	When Retractable lens is set, the zoom ring does not extend.
0x00200000	Bulb warning, ShutterSpeed is Time.
0x00100000	Card not formatted.
0x00080000	Card error.
0x00040000	Card protected.(Recording media is "Card" or "Card + SDRAM")
0x00020000	High temperature.
0x00008000	Capture command is executing.
0x00004000	Recording media is "Card" or "Card + SDRAM" and when no
	memory card is inserted in the camera, Release locked setting.
0x00000800	Non-CPU lens is attached, and ExposureMode is not Manual or
	Aperture priority.
0x00000200	TTL error
0x00000100	battery shortage
0x00000020	Aperture ring is not minimum.
0x00000004	Sequence error

3.74. LiveViewImageZoomRate

This will set the zoom rate for Live View image.

Capability kNkMAIDCapability_LiveViewImageZoomRate

Object types Source

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_Unsigned

ulOperations kNkMAIDCapOperation_Get,

1: 25 % 2: 33 % 3: 50 % 4: 66% 5: 100 %

When the Live view is started, the value of this capability will be set to default value automatically.

The following cases, the ulVisibility of this capability is invalid and this Capability is set to read-only.

- · When the value of Capability_LiveViewStatus is not 1(ON).
- During movie file recording.

3.75. LiveViewImageSize

This will set size of Live View image.

Capability kNkMAIDCapability_LiveViewImageSize

Object types Source

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_Unsigned

ulOperations kNkMAIDCapOperation_Get,

kNkMAIDCapOperation_GetArray, kNkMAIDCapOperation_Set

Data one of eNkMAIDLiveViewImageSize

1: QVGA 2: VGA

When during movie file recording, this Capability cannot be set into.

3.76. CameraInclination

This will get inclination of camera.

Capability kNkMAIDCapability_CameraInclination

Object types Source

ulType kNkMAIDCapType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetDefault

Data one of eNkMAIDCameraInclination

<u>0: Level (included when the inclination cannot be detected)</u>

1: Grip is top2: Grip is bottom3: Level (Up Down)

When the Capability_CameraInclinationMode is false, or the camera cannot detect inclination of itself, the value of this capability is zero(Level).

3.77. RemainContinuousShooting

This will get the number of shot that can be recorded on SDRAM or the card in the continuous shooting mode by the command.

Capability kNkMAIDCapability_RemainContinuousShooting

Object types Source

ulType kNkMAIDCapType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetDefault

Data 0 - 100 (Default: 100)

The value of this capability is always under the value of Capability_ShootingLimit.

The value of this capability will be changed by the following setting.

· Capability_ImageSize

· Capability_CompressionLevel

Capability_HDRMode

Capability_AutoDistortion

· Capability_NoiseReduction

· Capability_SceneMode

3.78. RemainCountInMedia

This will get the number of shot that can be saved in Card in current image quality.

Capability kNkMAIDCapability_RemainCountInMedia

Object types Source

ulType kNkMAIDCapType_Unsigned

 ${\bf ulOperations} \qquad {\bf kNkMAIDCapOperation_Get}, \, {\bf kNkMAIDCapOperation_GetDefault}$

Data 0 — 65535 (Default:0)

When a card is not inserted, the value of this capability is 0.

The value of this capability is changed by the setting of camera.

3.79. LockExposure

This will get lock status of auto exposure.

Capability kNkMAIDCapability_LockExposure

Object types Source

ulType kNkMAIDCapType_Boolean ulOperations kNkMAIDCapOperation_Get Data True: Lock False: Unlock

3.80. LockFocus

This will get lock status of auto focus.

ulType kNkMAIDCapType_Range

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Data $-3\sim+1$ (Default:0)

The module sets the same step value as the value of Capability_EVInterva.

If any of the following, this Capability cannot be set into.

- When Capability_ExposureMode is set to "Auto", "Auto" (flash off)" or Special Effects Modes.
- · During movie recording.
- When the value of Capability_HDRMode is except 0 (Off).
- When the Capability_InternalFlashStatus is "Close" and Capability_ExternalFlashStatus is "Not Exist".
- When Capability_InternalSplMode is "Manual", Capability_ExternalFlashStatus is "2: Not Exist" and Capability_InternalFlashStatus is expect "2: Close".
- When Capability_InternalSplMode is "Manual" and Capability_ExternalFlashSort is "4: new communication".

3.88. ExternalFlashStatus

This will shows the status of External flash.

Capability kNkMAIDCapability_ExternalFlashStatus

Object types Source

ulType kNkMAIDCapType_Unsigned ulOperations kNkMAIDCapOperation_Get

Data one of eNkMAIDExternalFlashStatus

0: Ready 1: Not Ready 2: Not Exist

3.89. ExternalFlashComp

This will set the flash compensation of the external speedlight.

Capability kNkMAIDCapability_ExternalFlashComp

Object types Source

ulTypekNkMAIDCapType_RangeulOperationskNkMAIDCapOperation_Get

Data -3∼+3EV (1/6EV step)

This capability is valid when Capability_ExternalNewTypeFlashMode is either iTTL-BL(1), iTTL(2), AA(3) or GN(5).

3.90. ExternalFlashSort

This will get the sort of external speedlight.

Capability kNkMAIDCapability_ExternalFlashSort

Object types Source

ulTypekNkMAIDCapType_UnsignedulOperationskNkMAIDCapOperation_Get

Data one of eNkMAIDExternalFlashSort

0: non- communication.
2: new communication (with setting display)
4: new communication (without setting display:SB-400).
3: Not exist.

The camera cannot detect "1: old communication.", so this capability returns always "0: non-communication." when an Old communication speedlight is attached.

The relationship of external speedlight type and the speedlight made by Nikon is shown in the following table.

New communication (with setting	New communication (without setting	Old communication	Non- communication	Not detected
display)	display)			
SB-910	SB-400	SB-80DX、	SB-30,	SB-9、
SB-900、	SB-300	SB-50DX、	SB-29、	SB-8、

			SB-11、	
			SB-10,	
			SB-E	

3.91. ExternalNewTypeFlashMode

This will get flash mode when the Capability_ExternalFlashSort is 2 (new communication (with setting display)) or 4 (new communication (without setting display))

Capability kNkMAIDCapability_ExternalNewTypeFlashMode

Object types Source

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetArray,

Data one of eNkMAIDExternalNewTypeFlashMode

0: OFF

1: iTTL-BL

2: iTTL

3: AA(Auto aperture)

4: A(Non-TTL auto)

5: GN(Range-priority manual)

6: M(manual)

7: Repeating flash

8: The external speed light, new communication does not exist.

3.92. LensInfo

This will get the focal length and minimum F number.

Capability kNkMAIDCapability_LensInfo

Object types Source

ulType kNkMAIDCapType_String

ulOperations kNkMAIDCapOperation_Get

Data (e.g.)"35-70/F3.3-4.5D"

In a following lens type case, a corresponding character string is added.

- In the case of VR type lens,"VR"is added to a head.
- · In the case of D type lens,"D" is added to an end.
- · In the case of G type lens,"G" is added to an end.
- In the case of E type lens,"E" is added to an end.

3.93. RetractableLensWarningStatus

This will show the status of RetractableLensWarning.

Capability kNkMAIDCapability_RetractableLensWarningStatus

Object types Source

ulType kNkMAIDCapType_Boolean

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetDefault

Data True: Warning about retraction

False: Not warning about retraction

3.94. AFCapture

This will take a picture after auto focus and save an image to specified media.

Capability kNkMAIDCapability_AFCapture

Object types Source

ulType kNkMAIDCapType_Process ulOperations kNkMAIDCapOperation_Start

This will take a picture after auto focus. If the Capability_FocusMode is MF (0) or lens is not attached, the camera does shooting immediately without auto focus.

When auto focus failed, whether taking a picture or returning out of focus error, that is depends on the setting of Capability_FocusMode.

When Capability_ShootingMode is CL or CH, Numbers of photo in which a seriography is possible is the smallest number in Capability_ContinuousShootingNum, Capability_RemainContinuousShooting, or the remaining numbers of bracketing shot.

However, when the value of Capability_InternalFlashStatus is "0: Ready" or when the Capability_HDRMode is set up in addition to "0: Off", if the Capability_ShootingMode is set as continuous shooting mode, the same operation as "SingleFrame Mode" is taken.

When Capability_LiveViewStatus is ON(1), the ulVisibility of this capability is invalid and the ulOperations is set to invalid.

When the module prepared to get a main image, the module issues kNkMAIDEvent_AddChild to source object.

The media saved an image is specified by Capability_SaveMedia. When there is not free space in specified media, this capability returns kMAIDResult_MediaFull. And this capability returns kNkMAIDResult_NoMedia when card is under being formatted or no card is inserted.

If any of the following, the ulOperations of this capability cannot be performed.

- When the value of Capability_LiveViewStatus is 1(ON).
- · When the Capability_ShutterSpeed is set as "Time".
- · When the Capability_RetractableLensWarningStatus is "True: Warning about retraction".

3.95. ContrastAF

This will control contrast AF when Live view is executed on Tripod mode.

Capability kNkMAIDCapability_ContrastAF

Object types Source

ulType kNkMAIDCapType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

one of eNkMAIDContrastAF

0x00: start AF (effective only as the Set value) 0x01: stop AF (effective only as the Set value)

0x10: AF finishes in focus (effective only as the Get value)0x11: AF finishes out of focus (effective only as the Get value)

0x12: It is operating AF (effective only as the Get value)

Contrast AF will start when the client set 0x00 (start AF). And the module will return the response without wait for AF finish.

The client can confirm whether contrast AF finish correctly by getting value of this capability, or referring "focus drive state" of "display information" in Live view image. (please refer NkMAIDCapability_GetLiveViewImage)

When the client wants to stop contrast AF, the client will set 0x01 (stop AF). After contrast AF finish, the module returns response.

The following cases, this capability is invalid and this capability is set to read-only.

- · When the CPU lens is not attached.
- When the Capability FocusMode is "MF".
- When the value of Capability_LiveViewStatus is 0(OFF).
- · When the Capability_RetractableLensWarningStatus is true.

3.96. PreCapture

This will take a picture for presetting white balance.

Capability kNkMAIDCapability_PreCapture

Object types Source

ulType kNkMAIDCapType_Process ulOperations kNkMAIDCapOperation_Start

Data None

If any of the following, the ulOperations of this capability cannot be performed.

• When the Capability_LiveViewStatus is 1(ON).

· When the Capability_ShutterSpeed is set as "Time".

• When the Capability_RetractableLensWarningStatus is "True: Warning about retraction".

· When the value of Capability_HDRMode is except 0 (Off).

3.97. MFDriveStep

This will set the driving step of lens for adjusting focus position during live view.

Capability kNkMAIDCapability_MFDriveStep

Object types Source

ulType kNkMAIDCapType_Range

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Data driving step (Number of pulses) 1 to 32767

This capability will save the driving step internally, does not send request for adjusting focus position to camera. Capability_MFDrive will send request for adjusting focus position to camera with this capability value actually.

The following cases, the ulVisibility of this capability is invalid and the ulOperations is set to invalid.

- When the value of Capabilty_FocusMode is "MF" or "AF~F".
- When CPU lens is not attached.
- When the value of Capabilty_LiveViewStatus is "OFF".

3.98. MFDrive

This will adjust focus position during live view.

Capability kNkMAIDCapability_MFDrive

Object types Source

ulType kNkMAIDCapType_UnsignedulOperations kNkMAIDCapOperation_SetData one of eNkMAIDMFDrive

0: infinity -> close1: close -> infinity

This will send request to adjust focus position with the setting of this capability and the step of Capability_MFDriveStep. The module will return response as soon as the camera starts adjusting manual focus position, the module doesn't wait to finish manual focus driving. If manual focus driving reaches the end of focus area, the module will return kNkMAIDResult_MFDriveEnd.

After this capability is executed correctly, the client can confirm whether manual focus driving finish correctly by getting value of this capability, or referring "focus drive state" of "Display information" in Live view image.

The following cases, the ulVisibility of this capability is invalid and the ulOperations is set to invalid.

- When the value of Capabilty_FocusMode is "MF" or "AF~F".
- · When CPUlens is not attached.
- · When the value of Capabilty_LiveViewStatus is "OFF".

3.99. ContrastAFArea

}

This will change focus point of contrast AF during live view.

```
Capability kNkMAIDCapability_ContrastAFArea

Object types Source

ulType kNkMAIDCapType_Point

ulOperations kNkMAIDCapOperation_Set

Data struct NkMAIDPoint

{

SLONG x; ----Coordinates of X axis

SLONG y; -----Coordinates of Y axis
```

This capability set the focus point by using x and y of NkMAIDPoint structure.

The value range of x and y is defined by "total size" of "Display information" in Live view image. (please refer NkMAIDCapability_GetLiveViewImage)

But the range that can be actually set becomes an area where "size of the AF frame" length and breadth size half was subtracted from the length and breadth size of "total size" respectively. When the value that exceeds the range that can be set to x and y is set, the maximum or minimum value will be used as this value.

Even though Capability_FocusMode is 0(MF), or CPU lens is not attached, this capability can be set.

When the Capability_LiveViewStatus is not "1: ON", this Capability cannot be set into.

3.100. CaptureDustImage

This will take a dust off ref photo and saved to specified media.

Capability kNkMAIDCapability_CaptureDustImage

Object types Source

ulType kNkMAIDCapType_Process ulOperations kNkMAIDCapOperation Start

The format type of dust off ref photo is kNkMAIDFileDataType_NDF.

When the client deletes a dust off ref photo by Capability_DeleteDramImage, the client must use Item ID notified by data parameter of kNkMAIDEvent_AddChild as

Capability_CurrentItemID. The media saved an image is specified by Capability_SaveMedia. When there is not free space in specified media, this capability returns kMAIDResult_MediaFull. And this capability returns

The following cases, this Capability cannot be performed.

- When the capability_LiveViewStatus is 1 (ON).
- · When CPUlens is not attached.
- When the value of Capabilty_ShutterSpeed is "Time".
- Capabilty_RetractableLensWarningStatus is "True: Warning about retraction".

3.101. DeleteDramImage

This will delete DRAM image specified by Capability_CurrentItemID.

Capability kNkMAIDCapability_DeleteDramImage

Object types Source

ulType kNkMAIDCapType_Process ulOperations kNkMAIDCapOperation_Start

The DRAM image to be deleted is specified by Capability CurrentItemID.

This capability execution timing is limited to the following case.

 After issuing kNkMAIDCapability_Acquire for Image Object, and before issuing kNkMAIDCommand_Close.

The client will issue Capability_Acquire for Image object and cancel

Capability_Acquire by kNkMAIDCommand_Abort, and set Capability_CurrentItemID and execute this capability, so, the deletion will be completed.

In case of deletion of RAW+JPEG, if the client executes this capability for JPEG, the both of RAW and Jpeg files will be deleted at the same time.

When the client deletes DRAM image after receiving kNkMAIDEvent_AddChild, the

client must close Item object. The module does not close Item object.

This capability is not supported when an image is saved on Crad.

To Delete SDRAM image by this capability is prohibited, when it is applied for either of condition below. In this case, this capability returns kNkMAIDResult_NotSupported.

- When the value of Capability SaveMedia is "2: Card + SDRAM".
- · When during movie file recording.

3.102. RawJpegImageStatus

This will get whether the image is taken on RAW+JPEG mode.

Capability kNkMAIDCapability_RawJpegImageStatus

Object types Image

ulTypekNkMAIDCapType_UnsignedulOperationskNkMAIDCapOperation_Get

Data one of eNkMAIDRawJpegImageStatus

0: Single 1: Raw+JPEG

3.103. CurrentItemID

This will specify the DRAM image operated now.

Capability kNkMAIDCapability_CurrentItemID

Object types Source

ulType kNkMAIDCapType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

Item ID is used as an identifier that specifies the image data in SDRAM.

Item ID is notified by data parameter of kNkMAIDEvent_AddChild.

The value of this capability is referred by Capability_DeleteDramImage.

3.104. GetLiveViewImage

This will get Live view image.

Capability kNkMAIDCapability_GetLiveViewImage

Object types Source

ulType kNkMAIDCapType_Array

kNkMAIDArrayType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetArray

The client will get the size of Live view image by kNkMAIDCapOperation_Get, and get a actual Live view data by kNkMAIDCapOperation_GetArray.

Every time, the size of Live view image need not be confirmed with kNkMAIDCapOperation_Get in this capability before execution of kNkMAIDCapOperation_GetArray because the specification of Live view image is always fixation.

When the client want to get Live view image with kNkMAIDCapOperation_GetArray, the client must allocate the buffer for the maximum size, and set buffer to kNkMAIDArray.pData, and set allocate size to kNkMAIDArray.ulElements.

After reading preview image, kNkMAIDArray.ulElements will be updated with the actual size of Live view image I, the Live view image will be set to kNkMAIDArray.pData.

When Capability_LiveViewStatus is OFF(0), the ulOperations of this capability is set to read-only, kNkMAIDCapOperation_GetArray is invalid.

If Live view is stopped by camera automatically (including when the live view time limit passes), the module returns kNkMAIDResult_NotLiveView.

Live view image is consisted of "Display information" and "Live view image(JPEG)."

The pixel size of Live view image is different in each Live view data, each detailed information is set to "Display information" area.

Specification of Live view image

image quality	maximum file size	
Jpeg Basic	Header size 8 byte	
	376 byte / Display information	
	49,920Bbyte / Max Live view image

3.105. GetVideoImage

This will get Movie image.

Capability kNkMAIDCapability_GetVideoImage

Object types Video

ulType kNkMAIDCapType_Generic

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetArray

Data pointer to NkMAIDGetVideoImage structure

typedef struct tagNkMAIDGetVideoImage

{

ULONG ulType;----one of eNkMAIDArrayType

ULONG ulOffset;----Offset position that begins data acquisition

ULONG ulReadSize;----Size of acquired data

ULONG ulDataSize; ---- Size of buffer set to "pData"

LPVOID pData;-----Pointer to buffer

} NkMAIDGetVideoImage, FAR* LPNkMAIDGetVideoImage;

The client will get the size of Movie image by kNkMAIDCapOperation_Get, and get an actual Movie data by kNkMAIDCapOperation_GetArray.

While getting movie data, camera is automatically locked state, and the operation of the camera body is impossible.

"While getting movie data" means, it is the period from the first issued kNkMAIDCapOperation_GetArray, until canceled or until the completion of the all movie data.

In case of Get

The data size for the unacquisition is set to kNkMAIDGetVideoImage.ulDataSize. [In case of GetArray]

When the client want to get Movie image with kNkMAIDCapOperation_GetArray, the client must allocate the buffer for size to be acquired, and set buffer to kNk MAIDGetVideoImage.pData, and set allocate size to kNkMAIDGetVideoImage.ulEle ments, and set offset position to kNkMAIDGetVideoImage.ulOffset.

After reading, the size of data actually read will be set to kNkMAIDGetVideoIm age.ulReadSize and the Movie image will be set to kNkMAIDGetVideoImage.pDat a.

It is necessary to set "kNkMAIDArrayType_Unsigned" to kNkMAIDGetVideoImag e.ulType. When the value that exceeds the size of actual movie data is set, modul e returns kNkMAIDResult_ValueOutOfBounds.

[Cancel of getting movie data]

To cancel getting movie data, call kNkMAIDCapOperation_GetArray set to 0 to ulDataSize.

In the following cases, getting movie data will be canceled automatically by the camera.

- When the interval is issued kNkMAIDCapOperation_GetArray exceeds about 60 seconds.
- · Doing the following operations when "While getting movie data"
 - 1. Called the Capability other than GetVideoImage.
 - 2. Inserting or removing the card.

3.106. LockCamera

This will lock camera. When the camera is locked, user can't operate it directly.

Capability kNkMAIDCapability_LockCamera

Object types Source

ulType kNkMAIDCapType_Boolean

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set

kNkMAIDCapOperation_GetDefault

Data True: Lock False: Unlock

When Capability_LiveViewStatus is 1(ON), the ulOperations of this capability is set to read-only.

3.107. CameraType

This will get the camera type.

Capability kNkMAIDCapability_CameraType

Object types Source

ulTypekNkMAIDCapType_UnsignedulOperationskNkMAIDCapOperation_GetDataone of eNkMAIDCameraType

0x3C: D5500 0x44: D5600

3.108. LensType

This will get the lens type about CPU lens.

Capability kNkMAIDCapability_LensType

Object types Source

ulType kNkMAIDCapType_UnsignedulOperations kNkMAIDCapOperation_GetData one of eNkMAIDLensType

0x00000001: D type 0x00000010: G type 0x00000100: VR 0x00001000: DX 0x00010000: AF-S

0x00100000: Auto distortion control

0x01000000: Retractable lens

0x00000020: E type (Electromagnetism diaphragm)

0x00000040: STM lens

The value of this capability is expressed by the OR value.

When CPU lens is not attached, the module returns 0.

3.109. AFMode

This will set the focus mode for phase detection on still image shooting.

Capability kNkMAIDCapability_AFMode

Object types Source

ulType kNkMAIDCapType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetDefault

kNkMAIDCapOperation_Set

Data one of eNkMAIDAFMode

0: AF-S1: AF-C2: AF-A3: MF Fixed4: MF selected

This capability is affected by setting of Capability_FocusMode on still image shooting, Capability_LensType, Capability_ExposureMode.

When there is a change in the types of values that can be set in this Capability, the module sends to the client kMAIDEvent_CapChange.

The following cases, the ulOperations of this capability is set to read-only.

- Capability_AFMode is MF Fixed(3).
- AF-S lens is not attached.
- Capability_ExposureMode is Special Effects Modes (because Capability_AFMode is set to MF fixed(3))
- When the ulOperations of Capability_LiveViewStatus is ON(1)
- When the Capability_RetractableLensWarningStatus is "True: Warning about Retraction".

Conditions	Shooting mode	AFMode
AF-S lens is not attached.		MF Fixed
AF-S lens is attached+MF setting (lens settings)		MF Fixed
Retractable lens is attached + RetractableWarning		MF Fixed
AF-S lens is attached + AF setting (lens settings)	P,S,A,M	AF-S, AF-C, AF-A ,MF selected
AF-S lens is attached+AF setting (lens settings)	Scene modes effects	AF-A ,MF selected

When the value of Capability_FocusAreaMode is "3D-tracking" or "Dynamic(9/21/39points)", if the value of this capability is set to AF-S(0), the value of Capability_FocusAreaMode is changed into "Single" automatically.

3.110. AFModeAtLiveView

This will set the focus mode of the live view.

Capability kNkMAIDCapability_AFModeAtLiveView

Object types Source

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_Unsigned

ulOperations kNkMAIDCapOperation_Get,

kNkMAIDCapOperation_GetArray, kNkMAIDCapOperation_Set

Data one of eNkMAIDAFModeAtLiveView

0: AF-S 2: AF-F

3: MF fixed (effective only as the Get value)

4: MF selected

When Capability_ExposureMode is "Miniature", "Photo Illustration", "Toy Camera Effect" of Special Effects modes, AF-F does not enumerate.

If any of the following, the ulOperations cannot be set into.

- This capability is MF fixed(3).
- During movie recording.
- Capability_RetractableLensWarningStatus is "True: Warning about retraction". (because Capability_AFMode is set to MF fixed(3))
- When the value of Capability_LensType is not "0x00010000: AF-S".

3.111. LiveViewAF

This will set the focus point in live view mode.

Capability kNkMAIDCapability_LiveViewAF

Object types Source

ulType kNkMAIDCapType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetDefault,

 $kNkMAIDCapOperation_Set$

Data one of eNkMAIDLiveViewAF

0: Face priority

1: Wide area

2: Normal area

3: Subject tracking

In the following table, the default value is changed by Scene modes or Special Effects modes.

When the setting of Capability_ExposureMode is changed to Scene Modes or Special Effects modes, the value of this capability will be changed to each default value.

the value of this capability will be changed to each default value.				
Capability_ExposureMode	default value			
Capability_SceneMode Capability_EffectMode

^{*1:} The value in parenthesis after "Auto" and "Flash Off" show the value of Capability_AutoSceneModeStatus.

When [3 : Subject tracking] is set while executing a live view, kNkMAIDResult_ValueOutOfBounds is returned.

And, when a live view is begun when [3 : Subject tracking] is set, the value of this capability is automatically changed to [1 : Wide area].

If any of the following, the ulOperations cannot be set into.

- The Capability_ExposureMode is "Auto", "Flash Off" or "Miniature" of Special Effects modes.
- · During movie file recording.

3.112. MovRecInCardStatus

This will start or stop movie recording and show status of movie recording.

Capability kNkMAIDCapability_MovRecInCardStatus

Object types Source

ulType kNkMAIDCapType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set,

kNkMAIDCapOperation_GetDefault

Data one of eNkMAIDMovRecInCardStatus

0: OFF 1: ON

When the client start movie recording in the card, the client must set the value of this capability to ON(1). And when the client stop movie recording in the card, the client must set the value of this capability to OFF(0).

In case of kNkMAIDCapOperation_Get, the value of this capability will show the current status of movie recording.

This capability is accepted only during Live view execution.

It is recommended to check the value of Capability_MovRecInCardProhibit before issuing this capability. If the Capability_MovRecInCardProhibit is a value other than 0, the client cannot start movie recording.

When the Capability_LiveViewStatus is set to OFF(0), movie recording is automatically stopped by the camera.

Taking a picture of the still picture is prohibited while movie file recording.

The following cases, this Capability cannot be performed.

• When the Capability_LiveViewStatus is "OFF(0)".

3.113. MovRecInCardProhibit

This will show the status of movie recording prohibition.

 $\textbf{Capability} \qquad \qquad \text{kNkMAIDCapability_MovRecInCardProhibit}$

Object types Source

ulTypekNkMAIDCapType_UnsignedulOperationskNkMAIDCapOperation_Get

Data one of eNkMAIDMovRecInCardProhibit

The movie recording prohibition is shown by the OR value of the following definition value. When 0 returns, the status is not movie recording prohibition.

Value	Prohibition condition
0x00001000	During enlarged display of Live view
0x00000800	Card protected
0x00000400	During movie file recording
0x00000200	There is unrecorded image or movie data
	in the buffer.
0x00000008	No free area in the card
0x00000004	Card not formatted
0x00000002	Card error
0x00000001	No card inserted

This Capability becomes effective only while executing a live view.

When the Capability_LiveViewStatus is OFF(0), the value of this capability is not fixed. Even if a value has been entered, it is not guaranteed.

3.114. SaveMedia

This will set the recording media by shooting, shutter-release button on camera body or Capability_Capture or Capability_AFCapture, Capability_CaptureDustImage.

Capability kNkMAIDCapability_SaveMedia

Object types Source

ulType kNkMAIDCapType_Unsigned

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_Set,

kNkMAIDCapOperation_GetDefault

Data one of eNkMAIDSaveMedia

<u>0: Card</u>

1: SDRAM

2: Card + SDRAM

When during movie file recording, this Capability cannot be set into.

3.115. BlinkingStatus

This will show the status of the display a shutter speed and an aperture of the camera.

Capability kNkMAIDCapability_BlinkingStatus

Object types Source

ulType kNkMAIDCapType_Unsigned ulOperations kNkMAIDCapOperation_Get Data one of eNkMAIDBlinkStatus

0: Both a shutter speed and an aperture are displayed with normal

status.

1: Only a shutter speed is displayed with blinking status.

2: Only an aperture is displayed with blinking status.

3: Both a shutter speed and an aperture are displayed with blinking status.

In case of bulb or warning of the time, the value of this Capability is set to 1(flashing only the shutter speed).

3.116. AutoSceneModeStatus

This will show the scene mode which the Automatic Scene Selection selects automatically.

Capability kNkMAIDCapability_AutoSceneModeStatus

Object types Source

ulType kNkMAIDCapType_Enum

kNkMAIDArrayType_PackedString

ulOperations kNkMAIDCapOperation_Get, kNkMAIDCapOperation_GetArray,

Data

Automatic Scene Selection	"Unjudgment"
is invalid.	
Auto	"Auto"

4.17. Capture

This will take a picture and save the image to specified media.

Capability kNkMAIDCapability_Capture

Object types Source

ulType kNkMAIDCapType_Process ulOperations kNkMAIDCapOperation Start

When the Capability_ShootingMode is 1(C) or 2(CH), the number of shots set by the Capability_ContinuousShootingNum is taken on continuous shooting mode.

Number of shots is the smallest in value of the Capability_ContinuousShootingNum or value of the Capability_RemainContinuousShooting or Bracketing Shot is remaining number of frames.

When the Capability_ShootingMode is 4(Mirror up), or movie file recording and Capability_MovieReleaseButton is not Live frame grab, the ulVisibility and ulOperations of this capability is set to invalid.

When image is prepared to acquire, kNkMAIDEvent_Add is issued to source object. If the client executes this capability while doing Live view, Live view will be stopped by camera, and the camera take a picture with AF position set on Live view without Auto focus.

The media saved an image is specified by Capability_SaveMedia. When there is not free space in specified media, this capability returns kMAIDResult_MediaFull. And this capability returns kNkMAIDResult_NoMedia when card is under being formatted or no card is inserted. This Capability becomes invalid during movie recording.

Bulb exposure shooting can be executed when

Capability_ExposureMode is Manual and Capability_ShutterSpeed is buib. The bulb shooting is started by this capability and terminated by Capability_TerminateCapture.

When live frame grab is active, if the Capability_ShootingMode is 1(C) or 2(CH), shooting is possible only one picture.

The following cases, the ulVisibility of this capability is invalid and the ulOperations is set to invalid.

- When the value of Capabilty_ShutterSpeed is "Time".
- · When the value of Capabilty_RetractableLensWarningStatus is "True".
- When during movie recording.
- Capability_ShootingMode is Mirror up.

4.18. Mode

Capability kNkMAIDCapability_Mode

Not supported

4.19. Acquire

Capability kNkMAIDCapability_Acquire

Object types Image, Thumbnail

ulType kNkMAIDCapType_Process ulOperations kNkMAIDCapOperation_Start

When Object types are set to Thumbnail, this Capability may return

 $kNkMAIDResult_NotSupported\ error.$

When it detects the camera's internal image generation, the module starts reading the Image. Then, the module cache inside it.(Look-ahead processing)

Thumbnail obtaining and caching is not performed in the look-ahead processing.

When loading is complete Image, Inside the camera, the entire image data including a Thumbnail will be deleted.

Therefore, if after the completion of the process ahead, was executed this Capability for Thumbnail, this Capability is kNkMAIDResult_NotSupported error.

For reacquisition when the shooting took place at set "RAW + JPEG". If one image data can be transmitted is successfully carried out only image data of the other re-transmission.

5.5. CapChange

This event will be issued when the information of Capability is changed.

Event kNkMAIDEvent_CapChange

Object types Module, Source, Item

data parameter Capability ID

In the following cases, this event will be issued.

• When the content of structure "NkMAIDCapInfo" of capability was changed.

5.6. OrphanedChildren

Event kNkMAIDEvent_OrphanedChildren

Not supported

5.7. CapChangeValueOnly

This event will be issued when the current value of capability is changed.

Event kNkMAIDEvent_CapChangeValueOnly

Object types Module, Source, Item, Data

data parameter Capability ID

This event will be issued when only the current value of capability is changed (the array data, ulVisibility, ulOperations is not changed).

5.8. CaptureComplete

This will be issued when the acquisition or deletion of all images of which it takes a picture is completed.

Event kNkMAIDEvent_CaptureComplete

Object types Source

data parameter 1: The all SDRAM images by Capture, AFCapture,

CaptureDustImage are finished to read or deleted.

0: The all images by Capture, AFCapture, CaptureDustImage are

finished to record in card.

It shows that the all images are finished to record in card or the all SDRAM images were finished to read or deleted.

This event is not issued in case of shooting by shutter-release button.

5.9. AddChildInCard

This event will be issued when the child is added in card.

Event kNkMAIDEvent_AddChildInCard

Object types Item

data parameter Added child ID

When the added child is Item Object, Item ID will be set to the data parameter of call back function.

This event is issued only about the movie data preserved on the card. The still image data preserved on the card is not issued.

5.10. RecordingInterrupted

This will be issued the factor of discontinue when the recording of movie was stopped with error occurring.

Event kNkMAIDEvent_RecordingInterrupted

Object types Source

data parameter 1: Some error.

0: Low access speed card error.

5.11. CapChangeOperationOnly

Operation value or visibility of Capability has changed.

Event kNkMAIDEvent_CapChangeOperationOnly

Object types Module, Source, Item, Data

dataparamater Capability ID

Events to notify (the number of elements in the array, enumeration value configuration, value, etc. has not changed) if only Operation or visibility · Invalid attribute of Capability has changed.

6. Vendor Unique Results

6.1. ApertureFEE

The aperture is not set maximum F number.

Result kNkMAIDResult_ApertureFEE

Command Start

Capability Capture, AFCapture, PreCapture, CaptureDustImage

Explanation If the ExposureMode is set to Program or SpeedPriority and the

aperture ring of the lens is not set to maximum F number, the camera

cannot execute capture command.

Expected Action The client displays the message to set the aperture to maximum F number and is waiting for next command.

6.2. BufferNotReady

This is not used in the current module.

6.3. NormalTTL

The speedlight is set TTL mode.

Result kNkMAIDResult_NormalTTL

Command Start
Capability Capture

Explanation The camera cannot take a picture when an external speedlight is

attached and it is set TTL(measuring through the lens) mode.

Expected Action The client displays the message that the camera cannot take a picture

and is waiting for next command.

6.4. MediaFull

There are neither free spaces that can be recorded on the card nor a free space that can be recorded with built-in the camera SDRAM.

Result kNkMAIDResult_MediaFull

Command Start

Capability Capture, AFCapture, CaptureDustImage

Explanation There is no free space at the specified media, so the client can not take

a picture.

Expected Action The client displays the message that the camera cannot take a picture and is waiting for next command.

6.5. InvalidMedia

It shows that the client can not take a picture because recording media is broken.

Result kNkMAIDResult_InvalidMedia

Command Start

Capability Capture, AFCapture, CaptureDustImage

Explanation When Capability_SaveMedia is "Card" or "Card + SDRAM" it shows

the client can not take a picture because the card is broken.

Expected Action The client displays the message that the camera cannot take a picture

and is waiting for next command.

6.6. EraseFailure

This is not used in the current module.

6.7. CameraNotFound

The module did not find a camera on the bus.

Result kNkMAIDResult_CameraNotFound

Command The commands need access to the camera. (most of the commands for

the Source, the Item or the Data object.)

Explanation The camera was disconnected. If the client sends Async command to

the Module object at intervals, it can tell that the camera is

reconnected by AddChild event.

Expected Action The client displays the message that the camera was disconnected and

is waiting for next command.

6.8. BatteryDontWork

The main battery in the camera is used up.

Result kNkMAIDResult_BatteryDontWork

Command Start

Capability Capture, AFCapture, CaptureDustImage, PreCapture

Explanation The camera cannot take a picture because of the battery.

Expected Action The client displays the message that the camera cannot take a picture

and suggests changing battery.

6.9. ShutterBulb

The exposure time is set to Bulb.

Result kNkMAIDResult_ShutterBulb

Command Start

Capability Capture, AFCapture, CaptureDustImage

Explanation The camera cannot execute capture command if the

Capability_ShutterSpeed is set to bulb.

Expected Action The client displays the message that the camera cannot take a picture

and is waiting for next command.

6.10. OutOfFocus

Auto focus operation is failed.

Result kNkMAIDResult_OutOfFocus

Command Start

Capability Capture, AutoFocus, AFCapture, CheckContrastAF

Explanation When the Capability_FocusMode is AF-S(1) and auto focus operation

is failed, the camera cannot take a picture. Then this error is returned

for the start of Capability_Capture or Capability_AFCapture.

In case of the Capability_AutoFocus and Capability_CheckContrastAF,

this error will be returned when auto focus is failed.

Expected Action The client displays the message that the camera is out of focus and is

waiting for next command.

6.11. Protected

This is not used in the current module.

6.12. FileExists

This is not used in the current module.

6.13. Sharing Violation

This is not used in the current module.

6.14. DataTransFailure

An error occurred while data transference.

Result kNkMAIDResult_DataTransFailure

Command Start, Async
Capability Acquire

Explanation If this error occurs while the client read an image from DRAM, it will

lose the image.

Expected Action The client aborts the data transference.

6.15. SessionFailure

The module cannot open source object because the camera cannot open more session.

Result kNkMAIDResult SessionFailure

Command Open

Capability -

Explanation The camera can open 1 session. If the client tries to open more source

object, the module returns this error.

Expected Action The client displays an error message and is waiting for next command.

6.16. FileRemoved

This is not used in the current module.

6.17. BusReset

This command was aborted because bus-reset occurred.

Result kNkMAIDResult_BusReset

Command any command Capability any capability

Explanation If bus-reset occurred, the command, which the module is executing, is

aborted. Then the module returns this result for the command.

Expected Action The client sends the command again.

6.18. NonCPULens

This is not used in the current module.

6.19. ReleaseButtonPressed

This is not used in the current module.

6.20. BatteryExhausted

This is not used in the current module.

6.21. Capture Failure

The camera failed in measuring value for white balance preset data.

Result kNkMAIDResult_CaptureFailure

Command Start

Capability PreCapture

Explanation When it fails in white balance measurement(Capability_PreCapture),

this error is returned.

Expected Action The client displays the message to take a picture again and is waiting

for next command.

6.22. InvalidString

This is not used in the current module.

6.23. NotInitialized

This is not used in the current module.

6.24. CaptureDisable

This is not used in the current module.

6.25. DeviceBusy

A camera did not receive a command.

Result kNkMAIDResult_DeviceBusy

Command any command Capability any capability

Explanation Since a camera is in the state where the command is not receivable,

when it is not able to perform, this error returns.

Expected Action This command is sent again or a display of a user interface is returned

to the state before command execution.

6.26. CaptureDustFailure

The camera failed in taking a dust off ref photo.

Result kNkMAIDResult_CaptureDustFailure

Command Start

Capability CaptureDustImage

Explanation When it fails in taking a dust off ref

photo(Capability_CaptureDustImage), this error is returned.

Expected Action Do nothing.

6.27. ICADown

Enumeration of device can not be done correctly because ICA does not work on Mac OS X.

 ${\bf Result} \hspace{1.5cm} kNkMAIDResult_ICADown$

Command EnumChildren

Capability Children

Explanation This error is returned when enumeration of device can not be done

correctly because ICA does not work. This error code is used only on

Mac OS X.

Expected Action The client aborts the command and capability of device search. The

client displays the message that the camera must be powered off and

client application needs to restart.

6.28. NotLiveView

Live view was automatically stopped by the factor of the camera. (Included the case of that the live view time limit passed.)

Result kNkMAIDResult_NotLiveView

Command Start, Set

Capability GetLiveViewImage

Explanation Wen live view was automatically stopped by the factor of the camera

(Include the case of that the live view time limit passed.), this error is

returned.

Expected Action The client displays an error message and is waiting for next command.

6.29. MFDriveEnd

The focus position reached the end of focus area in manual focus.

Result kNkMAIDResult_MFDriveEnd

Command Set

Capability MFDrive

Explanation When the focus position reached the end of focus area by

Capability_MFDrive, this error is returned.

Expected Action The client displays an error message and is waiting for next command.

6.30. UnformattedMedia

It shows that the client can not take a picture because the card is unformatted.

Result kNkMAIDResult_UnformattedMedia

Command Start

Capability Capture, AFCapture, CaptureDustImage

Explanation When Capability_SaveMedia is "Card" or "Card + SDRAM" it shows

the client can not take a picture because the card is unformatted.

Expected Action The client displays the message that the camera cannot take a picture

and is waiting for next command.

6.31. MediaReadOnly

It shows that the client can not take a picture because the card is protected.

Result kNkMAIDResult_MediaReadOnly

Command Start

Capability Capture, AFCapture, CaptureDustImage

Explanation When Capability_SaveMedia is "Card" or "Card + SDRAM" it shows

the client can not take a picture because the card is protected.

Expected Action The client displays the message that the camera cannot take a picture

and is waiting for next command.

6.32. BulbReleaseBusy

It shows during bulb exposure shooting.

Result kNkMAIDResult_BulbReleaseBusy

Command Start, Set
Capability Capture

Explanation It shows during bulb exposure shooting

Expected Action If bulb exposure shooting started by Capability_Capture,

 $kNkMAIDResult_BulbReleaseBusy \ will \ be \ returned \ until \ bulb \ exposure shooting is terminated.$

6.33. DuringUpdate

Is not used in the current module.

$7. \quad kNkMAIDDataObjType_Video$

Capability for which data object type kNkMAIDDataObjType_Video can be used by this module applies to the content described in not the MAID3.1 rule but this document.

8. Capability table that can be set during live view photography, movie live view, movie recording.

The following table shows the capabilities that can be set during live view.

The capabilities not shown in the table can not be set during live view and Operation is set to read only.

The fields marked with "*" represent that this capability is read only under certain conditions. (For details, please refer each capability fields.)
